Experience

Kelly

Freelance Project

FEB 2025

Designed the end-to-end product experience, translating user and business requirements into system flows, high-fidelity interfaces, and interactive prototypes.

Built a custom design system and reusable UI patterns to maintain consistency and scalability across the product.

HCL Tech

UI UX Design Intern . Platforms Teams

JUN - AUG 2024

Collaborated with the Platforms Team to design and maintain the HCLTech Portal, translating requirements into system flows, wireframes, and high-fidelity responsive prototypes.

Selected Work

01

Less Retail

AI-POWERED SUPERMARKET OPERATION SaaS

Researched supermarket operations and business workflows to identify opportunities for AI-driven automation across complex operational processes.

Designed the end-to-end product workflow and multi-agent AI system, defining 4 specialized AI agents orchestrated through a centralized Tower Control

02

Prologis

SaaS PROJECT

Designed an end-to-end, map-based logistics real-estate platform that helps e-commerce, 3PL, manufacturing, retail, and multiple filter layers evaluate properties beyond basic size, price, and availability.

03

InsureTech

RESEARCH . UX . PROTOTYPING

Designed an AI-powered insurance review experience that transforms complex product configurations into actionable insights. Mapped end-to-end workflows and translated complex AI system outputs into an intuitive review interface.
